## BACK-PAINTED GLASS

This new option for backsplashes and countertops is quickly surpassing the use of natural stone tile. Sleek and easy to clean, glass backsplashes and countertops have become widely popular in kitchens, wet bars, dining areas, bathrooms, spas, foyers and lobbies in both horizontal and vertical applications.

Back-painted glass uses a paint technology developed specifically for superior adhesion to glass. After the glass is coated, it is heat-cured and coated again with a backing paint for additional protection, then heat-cured a second time. This ensures that the paint remains durable during handling and fabrication to reduce the possibility of scratches and cut-throughs.

Stock sizes are 84" x 130", 42" x 130" and 65" x 84", up to largest size capability of 96" x 144". The normal thickness is 1/4", but can range from 1/8" to 1" thickness. Edge finishing options available.

There are 13 stock colors available with a lead time of 5-10 days. Custom color-matching to Benjamin Moore Paints is also available with a lead time of 15-20 days.
